## Northwest Territories Population – July 2013

On July 1, 2013 Statistics Canada estimated that 43,537 people were living in the Northwest Territories, a decrease of 0.2% from the previous year. By comparison, Canada's population increased by 1.2% over the same period. This is the first set of population estimates that incorporates results for the 2011 Census.

With the exception of the Northwest Territories and the Atlantic provinces, all other provinces and territories experienced positive growth between July 1, 2012 and July 1, 2013. Growth exceeded the national level in Alberta (3.5%), Nunavut (2.6%), and Saskatchewan (1.9%).

In total, the population in the Northwest Territories fell by 83 persons between July 1, 2012 and July 1, 2013. The components of natural increase consisted of 677 births and 195 deaths, resulting in a net increase of 482 persons. Inter-provincial migration accounted for 2,104 persons moving into the Northwest Territories from other provinces and territories, while 2,847 persons moved away, representing a net loss of 743 persons. Internationally, there was a net immigration of 178 persons.

In terms of quarterly growth, the NWT population decreased by 67 persons between April 1, 2013 and July 1, 2013. The population decline resulted from a net loss of 249 inter-provincial migrants offset by a gain of 108 persons through natural increase and 74 net international in-migrants. This was the eighth consecutive quarter of negative net interprovincial migration.

Similar to previous years, Alberta accounted for the largest number of net inter-provincial migrants in and out of the NWT between July 1, 2012 and July 1, 2013. Approximately 541 persons moved to the NWT from Alberta and 1,207 persons moved from the territory to Alberta, resulting in net loss of 666 persons (Figure 1). Ontario, on the other hand, made the largest net contribution of new migrants to the territory. It was estimated that 540 people moved to the NWT from Ontario, while 291 people moved from the territory to Ontario, amounting to a net gain of 249 people.

The detailed components of population change for the Northwest Territories since 2007 are presented in Table 2.

Note: *Net International* represents the net total of all Immigrants, Emigrants, Returning Canadians, Non-Permanent Residents and Individuals Temporarily Abroad.  
*Error of Closure* represents the difference in population change as measured by the individual components of growth and that observed using 2006, 2001 and 1996 census based population estimates.
